

Social and environmental commitment in supplier selection

Last update: January, 2026

For Veil Energy, sustainability is a core value that also guides our procurement choices.

We carefully assess the actual and potential impacts of our activities on human rights and the environment, favouring suppliers that share our principles of social responsibility, transparency, protection of people, and respect for the environment.

We therefore collaborate with partners that demonstrate a **concrete commitment to ESG principles**, contributing to a responsible supply chain oriented toward sustainable development.

Our main suppliers

Veil Energy relies on **BTicino** for the supply of **technical and measurement equipment** used in monitoring activities.

As part of the **Legrand Group**, BTicino adopts structured sustainability and social responsibility policies, promoting respect for human rights throughout the supply chain, safe working conditions, inclusion, and the reduction of environmental impact.

For **cloud services and digital infrastructure**, Veil Energy collaborates with **BlueIT SB**, a Benefit Corporation.

This choice reflects our intention to rely on a partner that, by statute, integrates objectives of positive impact on people, communities, and the environment, with particular attention to social responsibility, data protection, and ethical labor practices.

For **IoT solutions** and **digital SaaS services**, Veil Energy relies on **EFA**, part of the **Relatech Group**.

The Group operates according to an ESG strategy focused on respect for human rights, the empowerment of people, workplace safety, and the responsible management of the supply chain.

Our commitment

Veil Energy is committed to monitoring and continuously improving its procurement choices by **prioritizing suppliers that are attentive to human rights, people, and environmental sustainability**, as we believe that responsible growth also depends on conscious and transparent supplier relationships.
